

## Full Platinum Demo

\$5,500.<sup>00</sup>

### Full Platinum Demo Kit

When Digital Signage is your business, this is your weapon. The Spyeglass Full Platinum Demo system provides the latest in display and interactive technology right to your customer's fingertips. This system incorporates the best available projection film on the market with the latest in projective capacitance touch capability.

The demo system was designed to be set up and working in under 5 minutes without fumbling around with calibration or loading drivers. Spyeglass provides a computer pre-loaded with amazing demo

content that allows anyone who can power it up and align the projector to close sales. This system is for the people serious about wowing their customers and wanting to be on the leading edge of technology.

#### Touch Capable

The Full Platinum Kit goes one step beyond the standard Platinum Kit with the addition of a mini pc, mouse, keyboard and a projector.

### Kit Includes:

- Our full line of film and rigid sample screens (11.71" x 20.85") in a 16:9 format. Films are mounted to optical acrylic.
- Two acrylic stands with laser cut feet. Screens can be show upright (as seen above) for comparisons, or in landscape for individual presentation.
- A quality Screen Sampler that has all of our screen offerings in a small compact storage box. Each sample is labeled for easy identification.
- A 30" 16:9 Leanback tabletop display that quickly assembles into a smart and powerful touch demo unit that can display your sales presentation in a brightly lit room. The Demo has a super thin capacitance touch film bonded to the back of a 1/2" clear acrylic panel, with 3M Vikuiti Rear projection film applied directly to the back of the touchfoil. The unit has two polished aluminum legs and creates a high-tech assembly that will intrigue your customers.
- A Mini PC that is pre-loaded with appropriate software, drivers and sales content so all you have to do is align the projector to the screen and turn it on--making your presentations fast and seamless. HD ready and color coded connections make it simple to hook up. Mouse and Keyboard are also included.
- A Hi-Definition Projector has been chosen to work with our mini PC so that the content fits and your screen samples look their best. You won't have to worry about black bars on the sides or top. We also include a thin template that rolls out so you can put your projector and screen at the exact distance apart, reducing your set-up time.

### Kit Includes: (cont.)

- A CD/DVD loaded with a sales presentation and content to show your clients what the possibilities are for their project without spending money to create custom content.

### Style meets protection.

The Leanback comes with one of our padded carrying cases that are hand-sewn using ballistic vinyl, foam padding, and have a soft fabric interior to protect your new projection screen. The case comes with accessory pockets, zipper closure, and handles for easy transport.

The whole kit packs into a hard molded plastic shipping case that will protect your investment.

### Cleaning & Care

Rinse with clean water and dry by blotting with a damp cloth or chamois. Do not use window cleaning sprays, kitchen scouring compounds or solvents such as acetone, gasoline, benzene, alcohol, carbon tetrachloride, or lacquer thinner. These can scratch/deteriorate the screen surface.
