Platinum Demo Kit

For the company who really wants to be on the leading edge, Spyeglass has created the all inclusive Platinum Demo Kit. This kit is a turn-key digital signage selling machine; all you have to add is a computer and projector, and you're ready to sell.

When you walk in with this kit, you walk out with amazed clients. This kit comes with two hours of phone support for setting up your own computer, additional time will be billed at the standard technician dealer rate.

Touch Capable

The Platinum Kit takes our demo kits one step further by adding touch capability to the "Leanback" display and a CD of specialized sales content that is ready to be loaded and displayed to your customers.

Kit Includes:

- Our full line of film and rigid sample screens (11.71" x 20.85") in a 16:9 format. Films are mounted to optical acrylic.
- Two acrylic stands with laser cut feet. Screens can be show upright (as seen above) for comparisons, or in landscape for individual presentation.
- A quality Screen Sampler that has all of our screen offerings in a small compact storage box. Each sample is labeled for easy identification.
- A 30" 16:9 Leanback tabletop display that quickly assembles into a smart and powerful touch demo unit that can display your sales presentation in a brightly lit room. The Demo has a super thin capacitance touch film bonded to the back of a 1/2" clear acrylic panel, with 3M Vikuiti Rear projection film applied directly to the back of the touchfoil. The unit has two polished aluminum legs and creates a high-tech assembly that will intrigue your customers.
- A CD/DVD loaded with a sales presentation and content to show your clients what the possibilities are for their project without spending money to create custom content.
- A padded carrying case that is hand-sewn using ballistic vinyl, foam padding, and a soft fabric interior to protect your new projection screen. Cases come with accessory pocket, zipper closure, and handles for easy transport.

Touch Software

- Software CD for Touch Screen

Style meets protection.

The Leanback comes with one of our padded carrying cases that are hand-sewn using ballistic vinyl, foam padding, and have a soft fabric interior to protect your projection screen. The case comes with accessory pockets, zipper closure, and handles for easy transport.

The whole kit packs into a hard molded plastic shipping case that will protect your investment.

Cleaning & Care

Rinse with clean water and dry by blotting with a damp cloth or chamois. Do not use window cleaning sprays, kitchen scouring compounds or solvents such as acetone, gasoline, benzene, alcohol, carbon tetrachloride, or lacquer thinner. These can scratch/deteriorate the screen surface.
